

UDAYA BHANDARKAR

bhandarkar.udaya.2001@gmail.com | +44 7818 356477 | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

EDUCATION

Warwick Business School, University of Warwick, United Kingdom
MSc Business Analytics

Sep 2025 – Sep 2026

Manipal Institute of Technology, India
BTech in Electrical & Electronics Engineering

Jun 2019 – Jul 2023

WORK EXPERIENCE

Data Engineer – Genpact, Bengaluru, India

Aug 2023 – Aug 2025

- Implemented a Medallion Architecture on Databricks Delta Lake, ingesting data from APIs, external databases, ERP Systems (Oracle, SAP), and transforming it using PySpark and SQL, reducing pipeline processing time by 40% using liquid clustering.
- Modernised data infrastructure for GE Vernova by migrating pipelines from Talend to Databricks, reducing data load volume by 55% using Dimensional modeling and incremental data logic.
- Developed Tableau dashboards on datasets exceeding 200M rows and collaborated with Data Analysts and cross-functional stakeholders to translate business requirements into production-grade data models supporting strategic decision-making.

PROJECTS

Event-Driven Transit Routing Tool for London - [Github](#)

Mar 2025 – Present

- Building a real-time transit capacity engine to predict and mitigate commuter bottlenecks, using Azure Functions to continuously ingest live Transport for London (TfL) telemetry data.
- Developing a streaming load-balancing model using PySpark on Azure Databricks and Azure Event Hubs to process high-velocity disruption alerts, translating complex streaming data into actionable operational insights.
- Mapping spatial network topology with a Neo4j cloud graph database to calculate the impact radius of station closures, enabling the system to dynamically route displaced passengers to alternative relief transit nodes.

Tesla Financial Analysis - [Click Here](#)

May 2025 – Dec 2025

- Extracted and structured financial data from Tesla's SEC 10-K filings (2018–2020) to conduct a time-series analysis of income statements and balance sheets.
- Calculated and interpreted key financial ratios (profitability, liquidity, solvency) to assess Tesla's financial strength, capital structure, and operational efficiency.
- Developed an interactive dashboard using Tableau and React to visualize key financial metrics and highlight trends, enabling more effective communication of analytical insights to stakeholders.

CERTIFICATIONS

- Databricks Certified Data Engineer Associate (Databricks, 2025)
- Databricks Certified Data Analyst Associate (Databricks, 2025)
- Microsoft Certified Azure Fundamentals (AZ-900)

SKILLS

- Data Engineering:** ETL/ELT Pipeline Design, Data Modelling (Star Schema, Medallion Architecture), Data Quality & Validation
- Programming:** SQL, Python, R
- Cloud & Platforms:** Azure, Databricks, AWS
- DevOps:** Airflow, Github, Docker
- Analytics & BI:** Tableau, Databricks Dashboard
- Collaboration:** Stakeholder Alignment, Cross-functional Delivery, Technical Documentation & Data Lineage
