EDUCATION

Warwick Business School, University of Warwick, United Kingdom
MSc Business Analytics

Sep 2025 – Sep 2026

Manipal Institute of Technology, India

Bachelor of Technology, Electrical & Electronics Engineering, Minor in Computational Intelligence

Jun 2019 – Jul 2023

GPA – 7.87/10

WORK EXPERIENCE

Co-Founder – ReplenishAI, United Kingdom

Sep 2025 – Present

- Building an AI-driven inventory optimization platform that predicts demand and automates replenishment, reducing stockouts and overstock for businesses.
- Defined the product vision, roadmap, and go-to-market strategy, validating use cases through market research and user interviews across retail and manufacturing.

Data Engineer – Genpact, Bengaluru, India

Aug 2023 – Aug 2025

- Modernized enterprise data infrastructure from Greenplum to Databricks, improving query execution speed by 45% and enhancing overall data processing efficiency.
- Designed and implemented a scalable ETL pipeline to ingest and structure data, improving data collection efficiency by 15% and transforming the data according to business requirements.
- Architected a secure outbound data flow from the Data Lake to external systems using AWS S3, Talend Server, Airflow and MFTN Server, streamlining data delivery for operational use.
- Built interactive Tableau dashboards using large datasets (200M+ rows) delivering insights for leadership team to make business decisions.

SKILLS

Technical Skills: Python, SQL, Tableau, Excel, PowerPoint, Databricks, PySpark, AWS, Azure, Data Modelling, Langchain

Soft Skills: Leadership, Team Management, Strategic Thinking, Time Management & Prioritisation, Active Listener & Speaker

PROJECTS

DebtFree - [Figma Prototype](#)

Nov 2025 – Present

- Engineered a high-fidelity mobile debt management app for international students in the UK, featuring Visa-Sync dynamic repayment recommendations (adapting to 20hr term/40hr holiday work limits), real-time FX-aware debt tracking across currencies, and Credit-Passport Builder integrating rent payments for credit score building.
- Designed behavioral finance features including gamified degree progress tracking, Safe-to-Spend calculations, and behavioral nudges showing purchases as "hours of work needed," addressing the unique financial challenges of international students managing £30K+ student loans while navigating UK visa work restrictions.

Case Study - Tesla Financial Analysis - [Click Here](#)

May 2025 – Dec 2025

- Extracted and structured financial data from Tesla's SEC 10-K filings (2018–2020) to conduct a time-series analysis of income statements and balance sheets.
- Calculated and interpreted key financial ratios (profitability, liquidity, solvency) to assess Tesla's financial strength, capital structure, and operational efficiency.
- Developed an interactive dashboard using Tableau and React to visualize key financial metrics and highlight trends, enabling more effective communication of analytical insights to stakeholders.

ACHIEVEMENTS

- Awarded** Bronze in the Hackathon conducted by Genpact under the Futurero Program
- Received** Silver Award for outstanding performance in a project under the Customer Success category

CERTIFICATIONS

- Databricks Certified Data Analyst Associate (Databricks, 2025)
- Databricks Certified Data Engineer Associate (Databricks, 2025)
- Microsoft Certified Azure Fundamentals (AZ-900)
